Release Notes for SimplerQMS Patch 3.7.0

Bug Fixes

ID	Summary	Details
SQ-1139	Home Dashboard Refresh and Training Count Issues	Fixed an issue in the New M-Files interface where the Home Dashboard refresh button did not update displayed information, and document count badges did not reflect changes after users completed their tasks. The Home Dashboard now refreshes correctly, ensuring document count badges display accurate, up-to-date information that matches the corresponding document lists.
SQ-1140	License Dashboard Refresh Issue	Fixed an issue in the New M-Files interface where the License Dashboard did not update after using the Force Logout functionality, incorrectly showing users as still logged in. The License Dashboard now correctly reflects the updated login status, ensuring accurate and up-to-date information after users are logged out.
SQ-1148	Quiz 2.0 Report – Incorrect Data After Quiz Updates	Fixed an issue where the Quiz 2.0 Report did not correctly reflect changes to quiz questions when questions were added or removed in subsequent versions. The report now accurately displays quiz questions and results across different versions, ensuring reliable reporting of user's quiz attempts.
SQ-1149	Documents Getting Stuck During Automatic Workflow Transitions	Fixed an issue where documents could become stuck during automatic workflow transitions, particularly when processing large documents or multiple actions simultaneously. The fix prevents failures in one background process from affecting others, ensuring documents can continue through their workflows as expected.
SQ-1150	Quiz 2.0 Dashboard Not Refreshing After Actions	Fixed an issue where the Quiz 2.0 Dashboard did not automatically refresh after completing actions during

12920 Major Version 1 released. Effective on 2026-10-29

Printed copies are uncontrolled - check that you are using the latest version.

ID	Summary	Details
		quiz authoring or training, sometimes resulting in errors. The dashboard now correctly updates after changes are made, ensuring a smoother and more reliable experience when creating or completing quizzes.
SQ-1146	Incorrect Latest Major Version Start Date on Documents Created from Templates	Fixed an issue where documents created from templates incorrectly inherited the Latest Major Version Start Date from the original template. Documents now correctly use their own major version start date, ensuring accurate tracking of document creation and version updates.
SQ-1145	Quiz 2.0 – Unable to Reassign Authors When No Questions Are Defined	Fixed an issue where users could not reassign quiz authors if no questions had been added to the quiz, preventing the workflow from progressing. Authors can now be reassigned even when the quiz contains no questions, ensuring a smoother quiz authoring process.
SQ-1151	Incorrect Training Record Count on Home Dashboard	Fixed an issue where the Home Dashboard displayed an incorrect number of training items because Quiz 2.0 Training Records were not included in the count. The dashboard now correctly includes these records, ensuring accurate visibility of assigned training items.
SQ-1152	Quiz 1.0 Incorrectly Allowed to Generate Quiz 2.0 Reports	Fixed an issue where Quiz 1.0 could access the Quiz 2.0 Report generation functionality, resulting in errors. Report generation is now correctly restricted to Quiz 2.0, preventing unsupported actions and ensuring the workflow functions as expected.

Improvements

ID	Summary	Details
SQ-1153	Application Key Field Made Read-Only	The Application Key field on Application API Key objects has been made read-only to prevent accidental modifications. This improvement helps protect existing integrations from unintended changes and ensures their continued reliability.
